

Welsh national tests: 27 April 2020 to 5 June 2020

The collection of Welsh national test data for the 2019/2020 academic year

Specification for software suppliers

Date of issue: 22 August 2019

Version: 1.0

Audience	Software suppliers of school information management systems.
Overview	This document is provided by the Welsh Government as a specification to support the above audience in developing their school information management systems to ensure that schools in Wales are able to submit data required to comply with statutory duties.
Action required	For schools in Wales to be able to comply with statutory duties in supplying the required data returns, the Welsh Government recommends that software suppliers of school information management systems that have customers in Wales take full consideration of this specification document when developing their systems.
Further information	Enquiries about this document should be directed to: Information Management Strategy Data Collection Team School Information and Improvement Branch Education Directorate Welsh Government Cathays Park Cardiff CF10 3NQ Tel.: 0300 062 5014 E-mail: IMS@gov.wales  @WG_Education  @EducationWales
Additional copies	This document can be accessed from the SDF pages of DEWi .
Related documents	The Validation CBDS 1920.3.x and Modular CBDS 1920.1.n should be used in conjunction with this specification.

1. Change log

Version 0.1

Released 3 July 2019

Issue 1	Specification for May 2020 collection
	Reference dates, file naming convention and validation dates have been rolled forward.
Issue 2	Removal of National Reading Test for 2019/20
	Throughout this document all references to the national reading test (Welsh and English) have been removed due to it phasing onto the online personalised assessments platform for 2019/20. This leaves the national numeracy (reasoning) test as the only paper test that is covered by this specification document.

Version 1.0

Released 22 August 2019

Issue 3	Baseline final version
	There are no changes from the previous version 0.1, only the formalisation of baselining this as a first final version and this is reflected in all the versioning of this document.

2. Introduction

This specification is presented as a single document.

Modular Common Basic Data Set (CBDS) 1920.1.n provides information on components of national curriculum assessments as applicable to Wales.

The 2020 assessment parameters in the Modular CBDS 1920.1.n have been updated to reflect change for 2019/20 assessment and Welsh national test processes.

The full CBDS documentation for Wales is available to download from the Software Development Forum (SDF) area of the Data Exchange Wales Initiative (DEWi) website at <https://www.dataexchangewales.org.uk/>.

The specification is supported by information provided in the *Welsh National Tests Collection and Reporting Arrangements* document, copies of which will be provided as soon as it is published.

2.1 Changes to reporting of teacher assessments

In May 2018, the Welsh Government published the outcome of the consultation on proposals to cease publication of teacher assessments and national reading and numeracy tests data below the national level. This can be found at <https://beta.gov.wales/education-amendments-relating-teacher-assessment-information-wales-regulations-2018>. Key stage 4 is unaffected by these proposals.

The amending regulations came into force in August 2018. From this point the Welsh Government has ceased to publish or make available teacher assessment and national tests data below the national level. Wales level data will continue to be published via [StatsWales](#) and all other publications.

This means that the school comparative reports with benchmarking for foundation phase, key stage 2 and key stage 3 will not be made available to any schools from August 2018. It is intended that the regulatory duty on schools to publish school comparative reports in their school prospectus, to provide it to governors for inclusion in governors' annual reports and to provide it with pupil reports to parents will be revoked. The duty on head teachers to provide a report on each pupil to parents at the end of each year, however, remains unchanged.

The reporting section of these specifications reflect this policy change.

2.2 National tests

In May 2020 all pupils in national curriculum years (NCY) 2 to 9 will sit the National Numeracy (Reasoning) Tests (NNRT). All NNRT results will be collected in one WNT file.

The NNRT are for **formative** use so that teachers in all maintained schools have

information on the reading and numeracy skills of their learners and a common understanding of strengths and areas for improvement in these skills.

The National Tests are focused on understanding learner progress, and not on school performance or accountability.

The purpose of data collection in relation to the national tests is to provide schools with age-standardised scores and progress measures in order to inform teaching and learning.

2.3 Transition to online personalised assessments

From 2018/19 the requirement for data collection was scaled down, and will continue to be scaled down over the next couple of years as the Welsh Government phases in online personalised assessments, which started with the Numeracy (Procedural) Personalised Assessment in the autumn term of 2018. In the 2019/20 academic year, learners in national curriculum, years 2-9 in maintained schools are required to take the **online** Numeracy (Procedural) and Reading Personalised Assessments (which can be taken at any point during the academic year that schools deem to be most beneficial in terms of gaining feedback on learners' skills). During 2019/20, the **paper-based** Numeracy (Reasoning) Test will be sat during a test window as has normally been the case.

Over time the personalised assessments will replace the paper-based tests, in line with this timetable:

Academic year	Numeracy Procedural	Reading (Welsh and English)	Numeracy Reasoning
2017/18	Paper	Paper	Paper
2018/19	Online	Paper	Paper
2019/20	Online	Online	Paper
2020/21	Online	Online	Online

Online assessments will be accessed via an assessment zone on Hwb. They will be marked automatically and feedback and reports will be supplied direct to schools.

2.3 Key dates

The provisional dates for WNT in 2020 are set as:

- the specified date on roll is 12 May 2020;
- the test window for WNT is 5 May to 12 May for primary schools, and 27 April to 12 May for secondary schools; and
- the deadline for submission of WNT to the Welsh Government via DEWi is 5 June 2019.

2.4 Data export

All pupils with a NCY (as taught and as reported via CBDS item reference 100068/<NCyearActual> as below) and with <EnrolStatus> (100060) equal to **M** or **C** will be included in the data export and must have a full and valid set of NNRT raw scores, test papers sat and dates of test:

- NNRT – pupils in each NCY 2 to 9.

For NNRT it is imperative that the correct date of test is entered by schools as this is needed for the calculation in DEWi that produces the progress and standardised score.

2.5 Dual registration

Where pupils are dual registered the following logic applies when agreeing which school should report data for these pupils:

- where a pupil is dual registered at a mainstream school and a pupil referral unit (PRU) or a special school it is the responsibility of the setting where the pupil is taught for the majority of time (main registered) to report the pupil's NNRT data;
- software should reference the enrolment status to identify if a dual registered pupil should be included in the return. Suppliers should select pupils in the relevant NCY group and where <EnrolStatus> (100060) is equal to **M** or **C**; and
- a main registered (M) PRU pupils' results may be submitted for WNT.

2.6 Welsh language

NNRT: English and Welsh versions of this test are available. The content of this test is the same and schools can select which test any individual pupil can sit irrespective of their <StudyWelsh>/(190053) code. Only one test result (English or Welsh) must be returned in the WNT return. This must have been sat by a pupil during the test window.

2.7 Valid codes

Valid codes are set out in the Modular CBDS 1920.1.n.

Validation checks to be provided as XSLT files.

Validation CBDS version 1920.1.n will contain all validation rules relevant to this collection, which has already been released in December 2018.

2.8 Pupils who are New to and English/Welsh Based Education System (NEWBES)

NEWBES guidance applies to NNRT.

There is no separate data collection for details of pupils who are NEWBES.

Separate guidance is provided detailing the circumstances where a pupil who is NEWBES may be excluded from the calculation of aggregate school statistics.

All pupils who meet the criteria for exclusion from aggregate statistics must be flagged and a valid date of entry recorded in their pupil record. These pupils should be assessed, and their assessment outcomes reported to parents and submitted in the pupil level WNT file.

By correctly flagging the pupil record in the MIS to indicate that the pupil has NEWBES status and entering a valid date of entry (of within the previous two academic years), results for NEWBES pupils will be excluded from school aggregate reports. WG provides functionality within the XSLT reporting software provided to suppliers to exclude only pupils with a NEWBES status and date of entry within the valid period for exclusion from school results i.e. the pupil arrived in the UK on or after 1 September 2017. Validation checks that report errors for pupils with NEWBES status and an invalid date of entry were removed in 2010 to allow a pupil's record to retain the NEWBES flag for historical records.

2.9 Extension of the NEWBES status

In May 2016, the Welsh Government issued further NEWBES guidance in the 'School Performance Reporting - Bulletin 1', about the discretion available to local authorities to extend the NEWBES status period in certain situations where a pupil leaves the UK and subsequently returns. This bulletin can be found here:

<http://gov.wales/topics/educationandskills/schoolshome/schooldata/using-school-information-and-reporting-on-performance/?lang=en>

Where a decision has been made to extend a pupil's NEWBES status, the pupil will need to remain correctly flagged in school MIS as meeting the NEWBES criteria and their date of entry changed as appropriate. Any pupil who has a date of entry earlier than 1 September 2017 (i.e. over the two-year time period) will be included in school and local authority-aggregations.

Please note, extensions to the NEWBES status will be monitored by the Welsh Government and unusual patterns will be followed up with the local authority.

2.10 Revisions

In the event of revisions being required, a new specification document will be provided with a new sequential version number.

A revised version of Modular 1920.1.n, will be released to clarify any changes made to the national curriculum orders and assessment requirements for 2020. This document will NOT be re-issued unless changes are made specifically to it.

The change log at the beginning of this document summarises the amendments made in each new version.

2.11 XSLT validation and reporting

The Welsh Government will provide XSLT validation and reporting tools for use by all suppliers of school MIS providing WNT functionality. These files will be released to suppliers in the autumn term 2019.

Suppliers may wish to provide a validation report for WNT, listing pupils with their raw scores, which will assist schools with their data entry and help eliminate keying errors.

3. Required functionality

The purpose of the software to which this specification applies is to facilitate the electronic collection of NNRT from schools at pupil level. The collection of this data is referred to as the Welsh National Tests Collection or WNT.

The software should form part of the basic or standard packages offered by suppliers to schools and should offer the functionality to:

- undertake data entry, through a simple data entry screen, of the assessment component indicated as required in the WNT components file;
- provide a simple export routine to allow transfer of pupil NNRT data (raw scores, test papers sat and dates of tests), in XML format, for NCY 2 – 9;
- provide the facility to import, store year on year and access data converted in DEWi, i.e. standardised score, progress score, progress score difference and significance – this is not a required functionality but would be beneficial to enable schools to use data alongside other assessment data for formative purposes; and
- storing the progress score will also enable MIS to calculate the progress score difference and significance should it be recommended that suppliers do so in future years. In 2020, the progress score difference and significance is being calculated in DEWi.

3.1 Data Exchange Wales Initiative (DEWi)

The Data Exchange Wales initiative (DEWi) provides online, real time validation and secure file exchange/share functionality to all schools and local authorities in Wales. All schools will be required to upload their WNT files to the DEWi system from where local authorities will carry out initial validation before authorising the Welsh Government to download a copy of the validated file. Local authorities will be able to access the data for schools they maintain from the DEWi system. Schools will be able to download reports and converted scores for WNT tests from the DEWi system.

4. Notes on software requirements

Allowable data values for each data item are indicated in Modular CBDS 1920.1.n.xls, and the relevant tabs that contain the accompanying look-up tables.

Valid outcome codes for all national tests are indicated in Modular CBDS 1920.1.n.xls for academic year 2019/20.

4.1 School output files

Pupils taught in the appropriate NCY and on roll as at the on roll date must be included in the export of WNT data, i.e. the school where a pupil is on roll on the on roll date must submit their results.

The only valid NCY groups to be exported are:

- NNRT - pupils in each NCY 2 to 9

All pupils, including NEWBES pupils, in NCY 2 to 9 should be exported to WNT files as appropriate.

All pupils, excluding valid NEWBES pupils, should be included in statutory aggregations for reporting at school level.

For suppliers to ensure that the correct group of pupils is presented for data collection and exported for dual registered pupils for WNT, they should select pupils where:

- NCY group is in the range 2 to 9 and <EnrolStatus> (100060) is equal to **M** or **C**.

The broad organisation of the required school output file is as follows:

```
<Message>
  <SoftwareCode>...</SoftwareCode>
  <DocumentName>...</DocumentName>
  <AcademicYear>...</AcademicYear>
  <Header>...(Header data)...</Header>
  <School>...(School identifiers)...</School>
  <Pupil>...(Pupil data)...</Pupil>
</Message>
```

<Pupil> should be repeated as many times as required, according to the number of pupils eligible for NNRT result. Within <Pupil> the overall pattern is: identifiers followed by assessment data within container:

```
<Pupil>
  <NAWPupilIdentifiers>. ...(Pupil Identifier data)... </NAWPupilIdentifiers>
  <Assessments>
    <NAWAssessment>    ...(Assessment data)... </NAWAssessment>
  </Assessments>
</Pupil>
```

Presence of items is mandatory or optional as indicated in the output example file.

<NAWAssessment> should be repeated for each of the tests taken within given parameters and a result is required for each (see WNT Components for details of subject levels expected at each NCY).

In the header, <AcademicYear> has been included to indicate the academic year (i.e. the calendar year in which the academic year of assessment commenced).

Output formats are provided as relevant to WNT for files produced by school systems.

4.2 User requirements

Data entry facilities should exist for entry of the NNRT components included in the WNT. Every effort should be made to make data entry as simple and user friendly as possible, reducing the need for training and support on specialist modules.

Systems should limit user selection options to only those relevant to the specific pupil group.

Systems should automatically present the pupils as per the appropriate NCY group, date on roll and enrolment status (see section 5.1.1 above).

Users should not have the ability to deselect pupils outside of the specified group for export to the WNT process.

Data entry facilities should form part of suppliers' standard or basic bundles; the use of specialist or additional cost modules should be optional at school level.

The attached WNT components file provides details of the mandatory (M) and optional (O) assessment components to be entered, exported, calculated and reported for WNT.

Additional information including sample report layouts is provided in the *Welsh National Tests Collection and Reporting Arrangements* document, which will be available on the Welsh Government website in due course.

Welsh language users of some software have identified a need to have input screens in dual language. Translations will be provided on request and suppliers are requested to consider offering Welsh language versions where possible.

Reports should use the correct number of pupils according to WNT and language as the denominator when calculating percentages for aggregate reporting. Any requirement for aggregate reporting will be met by DEWi for NNRT in 2019. Suppliers will be kept informed and given access to any XSLT files in due course.

Calculation of statutory reports should exclude data for pupils legitimately marked as NEWBES and with a valid date of entry in their pupil record. Their results

should be omitted and they should not be included in the pupil denominator, except at Wales level.

Partial files: all XML files must contain valid results for all mandatory WNT components according to the appropriate year group.

5. Import files

Following **final** submission of the WNT file by schools, DEWi will calculate an age standardised score, progress score and progress score difference. All scores will be available for download via an import file by schools for import to their MIS. There will be a single file incorporating NNRT results called WNT.

There is no requirement for re-importing the import file.

Raw scores will be included in the import file and will not be expected to overwrite the value contained in the MIS. When an imported raw score differs from what was in the MIS, an alert or warning message should be triggered to inform the school of the discrepancy. The school may then contact their local authority or the Welsh Government for advice on what to do.

There will be one file available for import containing NNRT raw scores, standardised scores, progress scores and progress score differences.

The file naming convention for WNT XML import files will be:

<LA><Estab>_WNT_<LA><Year>_<serial number>.xml
(E.g. 6664002_WNT_66619_001.xml)

2020 scores will be available for schools to import following standardisation along with their pupil results sheets.

The following extract is from Import_File_WNT_1920.1.0.

6. File naming convention

6.1 XML data extraction

Long file names will be used.

The file extension will be XML.

The file name shall be constructed from the following components:

- (a) Origin Identifier (7 digits)¹
- (b) Survey/Data Extraction Type (3 characters)²
- (c) Destination Identifier (7 characters)³
- (d) Serial Number (3 digits)⁴

The components should be separated by underscore characters (“_”).

An example of a **WNT** file from a school sent to their local authority would be:

6604026_WNT_660NT20_001.XML

where:

6604026 is the originating school, local authority and establishment number
WNT stands for Welsh National Tests
660 is the destination local authority
NT indicates the file - refers to **National Tests**
‘20’ is last two digits of the academic year; and
001 refers to the version number of the file being uploaded.

The total file name length = 27 characters.

For files not yet authorised by the school the file extension should be changed from ‘XML’ to ‘UNA’.

¹ For WNT transfers from schools, the first 3 characters of the origin identifier will be the Local Authority (LEA) code of the sending school and the final 4 characters will be the WG school number of the sending school. For transfers from LAs, the origin identifier will be the LEA code of the sending LA and the WG school number to identify the submission.

² For WNT data the survey type will be “WNT”.

³ For WNT data submissions, the destination identifier will be the LEA code of the receiving LA for all WNT files. File names will also include a two-character year indicator (being the calendar year in which the academic year ended).

⁴ The first file in the series shall be “001”, the second “002” etc.

7. File components

O = optional (at users discretion); M = Mandatory/required (but may be calculated); N = NOT required

<ASSESSID> <Stage>	<ASSSUBJECT> <Subject>	ASSTYPE> <Method>	<ASSCOMP> <Component>	Component	Component Description	Data Entry	Test Paper Sat	Result Date (Date of Test)	Calculate if component data entered	Calculation/ weighting	Export to NDC File	Report to Parents	Notes
NT	MAT	TT	RSG	RSG	Numeracy Reasoning Raw Score	M	M	M	N/A	N/A	M	O	Pupils can sit either a Welsh or English test paper, irrespective of their <StudyWelsh>/(190053) code. Only one paper must be returned per pupil Raw score for numeracy reasoning test. Valid Levels 0 – 99. Actual raw score ranges for each test paper will be provided in Validation CBDS version 1920.3.n and in Modular CBDS 1920.1.n in due course. Valid Administrative codes are D and X D = Disapplied under the Education Act 2002; sections 113-116 X = absent on scheduled test date and remainder of test window

NB Export file includes Pupil CBDS items numbered 190053

8. School output example file

9. Reporting

Where suppliers opt to provide reports the following should apply.

The Welsh Government will review sample reports provided and provide Welsh language translations if required for any reports produced from school MIS.

Performance statistics for Wales 2020 will be provided during autumn 2020 via StatsWales <https://statswales.wales.gov.uk/Catalogue>.

9.1 Pupil results sheets

It is the duty of the head teacher to ensure that NNRT results are reported to parents. This is covered under the Regulations 2011 No. 1943 (W.210), The Head Teacher's Report to Parents and Adult Pupils (Wales) Regulations 2011.

Reports to parents should be available within standard software in both English and Welsh. Provision of all other reports in English and Welsh is optional at the discretion of individual suppliers although we are aware that schools and local authorities would welcome this functionality. **However, pupil reports for reporting NNRT outcomes will be provided by the Welsh Government via DEWi and these should be used for reporting to parents.**

10. Modular CBDS 1920.1.5 extract

10.1 National Numerical Reasoning Test (NNRT)

<Stage>	<Year>	<Subject>	<Method>	<Component>	Component Description	<ResultQualifier>	<Result> Valid Entries	Max	Derivation/Calculation
NT	2020	MAT	TT	RSG	Numeracy Reasoning Raw Score	NR	For NCY2-9 = D, X, 0-99		Raw score for Numeracy Reasoning test. Valid Results are 0 – 99 Valid Administrative Codes are D and X D = Disapplied for any of the reasons listed in the National Reading and Numeracy Tests – Test administration handbook X = Absent on scheduled test date and remainder of test window or no valid result
